Logan Willaumez

Front-end Developer

Profile

After having traveled the world of 3D creation, my journey led me to meet the world of web development. Concerned about details and rigour, my past job help me to be able to apprehend a project and its difficulties creatively.

Experience

2021-2022 ● **O'clock - Web developper (student)**

- Create websites using ReactJS.
- Create a REST API, and test it using Postman.
- Create databases using SQL and PostgreSQL.
- Use NodeJS and Express.
- Use of CSS preprocessors such as SCSS.
- Use JEST for Unit testing.
- Use of GIT and GITHUB.

2019-2021 ● **Transurb - 3D Graphic designer**

- Model and texture buildings and objects related to inter) national projects.
- Integrate and homogenizes the assets together to best meet the expectations of customers
